Eurolite LED KLS-180 Compact Light Set 3	15/06/2020	14/11/2022	PASS		0.10	PASS	20.0	PASS	SKIP	PASS	PASS
Eurolite LED KLS-180 Compact Light Set 4	15/06/2020	14/11/2022	PASS		0.15	PASS	20.0	PASS	SKIP	PASS	PASS
Guitar Effects pedals	15/06/2020	14/11/2022	PASS		0.10	PASS	20.0	PASS	SKIP	0.08 MA	PASS
Roland TM 2	15/06/2020	14/11/2022	PASS		0.10	PASS	20.0	PASS	SKIP	PASS	PASS
VARIOUS LEADS	15/06/2020	14/11/2022	PASS		0.10	PASS	20.0	PASS	SKIP	PASS	PASS

Testing completed by : Neil Gahan - 12-02-2013

Does PAT Testing have to be completed by an Electrician ?

The Electricity at Work Regulations 1989 require that any electrical equipment that has the potential to cause injury is maintained in a safe condition. However, the Regulations do not specify what needs to be done, by whom or how frequently (ie they don't make inspection or testing of electrical appliances a legal requirement, nor do they make it a legal requirement to undertake this annually). As long as the person is competent, knows how to test and has the appropriate test equipment that is acceptable.

Is it compulsory ?

No. The law simply requires an employer to ensure that their electrical equipment is maintained in order to prevent danger. It does not say how this should be done or how often. Employers should take a risk-based approach, considering the type of equipment and what it is being used for. If it is used regularly and moved a lot e.g. a floor cleaner or a kettle, testing (along with visual checks) can be an important part of an effective maintenance regime giving employers confidence that they are doing what is necessary to help them meet their legal duties. HSE provides guidance on how to maintain equipment including the use of PAT.
